

DANIL BELTSOV

Senior Software Developer

+ (372) 55567106
Tallinn, Estonia
beltsov.me
danilbeltsov@gmail.com

Product-focused Software Engineer with experience owning and delivering high-impact features across the full development lifecycle. Specializes in translating product requirements into scalable, performant frontend solutions. Proven ability to improve key metrics such as load time, engagement, and system maintainability. Works effectively in cross-functional teams, balancing technical excellence with product and business priorities.

SKILLS

Frontend: JavaScript, TypeScript, Angular, React / Next.js, Ionic, Jest, Cypress

Backend: Node.js, Nest.js, Go, PostgreSQL, MongoDB

CI/CD: GitHub Actions, GitLab CI, Jenkins, Docker

Management: Mentoring & onboarding, Agile / Scrum planning, Product collaboration

AI Harnesses: Claude Code, Codex, MCP / custom agents, Llama

PROFESSIONAL EXPERIENCE

Senior Frontend Developer, Gepard Media ([Winz.io](https://winz.io)) (Oct. 2024 - Present)

- Upgraded the project to the latest Angular version and streamlined dependencies for better maintainability and performance.
- Reduced the initial bundle size by 30%, significantly improving load time and user experience.
- Designed and implemented multiple advent calendar-style promo campaigns, increasing user engagement during holiday seasons.
- Developed a Telegram bot mini-game (frontend/backend) that reached over 3,000 active users, enhancing the brand's interactive reach.
- Delivered features and resolved bugs as part of the day-to-day development cycle.

Senior Software Developer, Simplifield (Aug. 2022 - Apr. 2024)

- Diligently maintained and enhanced legacy applications to ensure optimal performance and user satisfaction.
- Conducted extensive refactoring efforts to streamline codebase, enhancing maintainability and scalability.
- Spearheaded the development and implementation of a dynamic dashboard feature, facilitating seamless document exchange and improving user experience.
- Implemented network payload optimization strategies to enhance system efficiency and reduce resource consumption, contributing to overall performance enhancements.

Senior Frontend Developer, [HYCM](#) (Dec. 2017 - Apr. 2022)

- Contributed to the development of a cutting-edge single-page application for crypto-trading, leveraging Angular and TypeScript technologies to deliver a seamless user experience.
- Contributed to the development of the Forex-trading platform and rewriting it with React.
- Integrated WebSocket functionality, enhancing real-time data updates and responsiveness within the application.

-
- Implement a robust state management system utilizing NgRx, ensuring efficient data flow and maintainability of the application.
 - Successfully integrate the application with lokalise.com for streamlined localization and translation management, enhancing accessibility for global users.
 - Provide mentorship and guidance to new developers, facilitating their smooth onboarding and fostering a collaborative team environment.

EDUCATION

Baltic State Technical University “VOENMEH” (2013 - 2018)

Bachelor's degree in Computer Science
